MASTER'S RECORDS

Evidence-based working directory compiled from Krishikosh, NDRI National Library OPAC and official award sources.

Not the Registrar's official degree roll. Evidence snapshot: 13 July 2026.

About this directory. Part I lists alumni by decade, one entry per person, built conservatively from the 712-record evidence register (exact-name grouping only; a probable M.Sc.+Ph.D. link is shown, never asserted). Where an alumnus has been verified against a citable public source, their current role is shown *with that source linked*; everyone else shows *Unverified* or *awaiting alumni form response* - no career detail is invented. Part II is the full evidence register with thesis links. Part III gives cohort statistics and guide lineage.

Help complete it. Alumni and their families can verify entries, add a photo/CV, and name missing batchmates via the alumni form. Enrichment fills in as responses arrive.
